### **DETAILED ACTION**

1. Responsive to communication application 10/643,799 filed on 08/18/2003 and Applicants amended filed on 01/27/2006, claim 21 is pending.

Claims 1-20 have been canceled.

Claim 21 has been added.

2. The new drawing filed on 01/27/2006 for figures 1-3 are accepted.

### ***Allowable Subject Matter***

3. Claim 21 is allowed.
4. The following is an examiner's statement of reasons for allowance: the prior art made of record does teach or fairly suggest the computer-implemented method for generating a layout for integrated circuit comprising the inventive steps generating a layout based on a physical design of the integrated circuit; performing a first circuit performance analysis on the layout; incorporating manufacturing enhancements on the layout, the manufacturing enhancements including optical proximity correction; performing a second circuit performance analysis on the layout using the layout with the manufacturing enhancements incorporated therein to generate a taped-out layout of the integrated circuit; checking design-rules on the taped-out layout; modifying the taped-out layout by performing the manufacturing enhancements on the taped-out layout using at least in part results of the first circuit performance analysis; and performing a third circuit performance analysis on the modified taped-out layout with the manufacturing enhancements included therein to generate a final layout to be used in manufacturing of masks for fabrication of the integrated circuit.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See PTO-892. Cote et al. (6,807,663) is closed to the applicant invention. Cote et al. disclose method performing OPC during the taped-out process and repeating structures circuit layout, but Cote et al. lacks to teach the step for modifying the taped-out layout using at least in part results of the first circuit performance analysis and the step performing analysis on the modified taped-out layout.
